

**Stabilizer for Diesel Fuel &
Home Heating Oil**

SUPER FUEL STABILIZER

Super Fuel Stabilizer is a concentrated blend of additives that helps eliminate water and slow or prevent the aging of Diesel Fuel and Home Heating Oil. This product meets or exceeds the U.S. Military Standards and ASTM Standards for preventing the aging of middle distillate fuels. It also exceeds the minimum standards established by NATO, Australia and engine turbine manufacturers.

Diesel Fuel and Home Heating Oil tend to age during storage. During this storage-aging process, the fuel will darken in color and cause hard starting, white or black exhaust smoke, injector deposits, rough running, vibrations and filter plugging. Super Fuel Stabilizer contains metal deactivators to prevent aging, dispersants to prevent sludge formation and anti-oxidants and stabilizers. Super Fuel Stabilizer is the best long term fuel stabilizer on the market today.
